Address: Blk 101 Synthetic Road #02-001, Singapore 000000

NRIC: S0000001Z

Profile: <https://example.com/in/synthetic-student-01>

Skills

Python, Java, SQL, PostgreSQL, Flask, Spring Boot, Git, Linux, HTML

Projects

Campus event booking service

Built a Flask application exposing endpoints that let students reserve seats at campus events. Designed the PostgreSQL tables, wrote SQL for the availability checks and added pytest cases covering the reservation rules.

Technologies: Python, Flask, PostgreSQL, pytest

Inventory microservice (coursework)

Implemented a Spring Boot service in Java with controllers, services and repositories using dependency injection. The service exposes REST endpoints for stock items and calls a second service for supplier data.

Technologies: Java, Spring Boot, REST

Nightly data loader

Wrote a Python script that reads exported CSV files, cleans the columns and loads them into PostgreSQL every night through a cron entry. Logged rejected rows for later review.

Technologies: Python, SQL, cron

Experience

Teaching assistant, introductory programming

Ran weekly lab sessions for 25 first-year students and marked Python assignments.

Technologies: Python

Education

BSc Computer Science - Currently in year 2
