

Aisha Binte Rahman

Email: synthetic.student03@example.com

Phone: +65 9000 0003

Address: Blk 103 Synthetic Road #04-003, Singapore 000000

NRIC: S0000003Z

Profile: <https://example.com/in/synthetic-student-03>

Skills

Python, PyTorch, scikit-learn, NumPy, OpenCV, Git, LaTeX

Projects

Sentiment classifier for product reviews

Trained a recurrent neural network in PyTorch to label product reviews as positive or negative. Split the data into training, validation and test sets and reported accuracy and F1 on the held-out portion.

Technologies: Python, PyTorch

News headline clustering

Turned headlines into TF-IDF vectors and grouped them with k-means in scikit-learn, then inspected the clusters by hand to name topics.

Technologies: Python, scikit-learn

Handwritten digit recogniser

Built a small convolutional network on the MNIST image set and compared it against a plain feed-forward network. Used OpenCV to resize and normalise the digit images and wrote the backpropagation step by hand with NumPy matrix operations.

Technologies: PyTorch, CNN, OpenCV, NumPy

Experience

Undergraduate research assistant

Cleaned a corpus of 20,000 tweets, wrote scripts to tokenise the text and helped run experiments on a text-classification model. Also fitted a linear regression to simulated demand data to check a forecasting idea.

Technologies: Python

Education

BSc Computer Science (AI specialisation) - Probability and statistics modules completed
