## Skills

JavaScript, TypeScript, React, Node.js, PostgreSQL, Docker, AWS, Git, Linux

## Projects

### Recipe sharing web app

Built a React and TypeScript interface for browsing and rating recipes, backed by a Node.js API and a PostgreSQL database. Wrote the API routes and the SQL queries, connected the front end to them and reviewed teammates' pull requests. Wrote Jest unit tests for the API routes and Playwright browser tests for the sign-up flow.

Technologies: React, TypeScript, Node.js, PostgreSQL, Jest, Playwright, Git

### Containerised deployment

Packaged the recipe app in Docker containers and deployed it to an AWS virtual machine. Set up a GitHub Actions workflow that runs the tests and rebuilds the containers on every merge.

Technologies: Docker, AWS, GitHub Actions

### Server hardening exercise

Configured a Linux server from the command line, set up SSH keys and a firewall, and wrote Bash scripts to automate backups.

Technologies: Linux, Bash

## Experience

### Freelance website builder

Built and launched a five-page website for a local bakery using HTML, CSS and JavaScript and handled the customer's change requests.

Technologies: HTML, CSS, JavaScript

## Education
